

A world map illustrating the global distribution of the Air Quality Index (AQI) in 2015. The map is color-coded to show the level of air pollution, with a legend in the bottom left corner indicating that green represents 'Very Clean' and red represents 'Very Polluted'. The map shows that North America, Australia, and parts of Europe and Asia have relatively clean air (green/yellow), while large areas of China, India, and parts of Africa and South America are heavily polluted (red).
